Q32 Bio to Participate in the 2026 Jefferies Global Healthcare Conference in London

November 11, 2026

WALTHAM, Mass., Nov. 11, 2026 /PRNewswire/ -- Q32 Bio Inc. (Nasdaq: QTTB) ("Q32 Bio"), a clinical-stage biotechnology company focused on developing innovative therapies for alopecia areata ("AA") and other autoimmune and inflammatory diseases, today announced that management will participate in a fireside chat at 12 p.m. GMT (7 a.m. ET) on Wednesday, November 18, 2026 at the 2026 Jefferies Global Healthcare Conference in London.

A webcast of the presentation will be available on the Events and Presentations page of Q32 Bio's website at www.q32bio.com. An archived replay will be available for 90 days following the event.

About Q32 Bio

Q32 Bio is a clinical-stage biotechnology company whose science targets potent regulators of the adaptive immune system to re-balance immunity and is focused on developing innovative therapies for alopecia areata and other autoimmune and inflammatory diseases. About 700,000 people in the United States live with alopecia areata[1], a disease which has a life-altering impact on patients and limited current treatment options. Q32 Bio is advancing bempikibart (ADX-914), a fully human anti-IL-7Rα antibody that re-regulates adaptive immune function, for the treatment of alopecia areata in an ongoing Phase 2 program. The IL-7 and TSLP pathways have been genetically and biologically implicated in driving several T cell-mediated pathological processes in numerous autoimmune diseases.
